Good Morning and Happy Friday Freddy and Jennifer!

I hope you've been having a great week.

You probably noticed that Citrus College submitted a Program Data Request last month for a new Drone/Uncrewed Aerial Systems (UAS) A.S. degree program. We have recently received the LMI report (attached), and your colleges were listed as offering Drone programs. We wanted to connect with you for the purposes of collegial consultation. I have copied Ryan Woolford, our lead faculty member who has been developing this program. He's also the one who developed our noncredit Drone Technology program which has been offered since fall 2022. Please feel free to reach out to Ryan directly should you have any questions and/or concerns.

Thank you, and may you have a lovely weekend!

Kim
