II. PROGRAM REPORT

- A More Integrated Classroom
 - **Emulating the work environment: Studio laptops (update)**

We have applied for and passed the first approval to incorporate laptops into the studio classroom. This would allow all students to design, draw, and work through a design solution as they would in an office. The grant covers laptops to a classroom of 30, a cart to store and move them, and the industry software.

III. DISCUSSION

- Program and Certificate - New
 - **Architecture Program and Certificate (New)**
 1. **ARC courses**

Proposed architecture courses were reviewed for application for transfer and for career skills. This was a lengthy discussion on critical skills needed for both. The discussion included: verbal, written, critical thinking, graphic skills (including rendering and model building), knowledge of building construction, and public speaking. A motion was passed based on the attached Architecture Narrative handed out in the meeting. A motion was made to proceed with the Architecture Program at Santa Monica College. The motion passed unanimously.
 2. **GE Courses**

General Education courses included in the proposed program were reviewed for applicability in transferring. It was agreed that the proposed courses fit with the current transfer requirements. A full articulation agreement will need to be reached and the GE courses shall align with the articulation agreement.

■ **Other Certificates:**

1. **Digital Design (Architectural)**

The current certificate in digital design under interior architecture was reviewed and is a critical entry level career for both fields. A motion was made to keep this certificate under both Architecture and Interior Architecture. The motion passed unanimously.

IV. ADJOURNMENT

The meeting was adjourned at 12:15pm.
