

Computer Infrastructure and Support (0708) - Labor Market Information

Cybersecurity Analyst, Cloud Security Administrator, Penetration Tester Certificates

August 2018
Prepared by the South Central Coast Center of Excellence for Labor Market Research

Labor Market Information

This report was compiled by the South Central Coast¹ Center of Excellence to provide regional labor market data for the proposed certificates - Cybersecurity Analyst, Cloud Security Administrator, and Penetration Tester - within the area of Computer Infrastructure and Support. This report can help determine whether there is demand in the local labor market that is not being met by the supply from programs of study that align with this occupation group.

Overview

- In 2016 there were 3 regional institutions with completions (8) in Computer Infrastructure and Support. Regionally there were 812 openings in this area.
- Job growth is expected for Information Security Analysts (+13%) over the next five years.
- Typical entry level education for Information Security Analysts is a bachelors degree.
- Starting Salary in the region for Information Security Analysts \$73,008.
- 65% of students are earning a living wage.
- 77% of students are employed after a year.

¹ The South Central Coast Region consists of San Luis Obispo County, Santa Barbara County, Ventura County, and the following cities from North Los Angeles County: Canyon Country, Castaic, Lake Hughes, Lancaster, Littlerock, Llano, Newhall, Palmdale, Pearblossom, Santa Clarita, Stevenson Ranch, and Valencia.

Occupation Codes and Descriptions

Currently, there is one occupation in the standard occupational classification (SOC) system that is related to the proposed certificates (Cybersecurity Analyst, Cloud Security Administrator, Penetration Tester) under Computer Infrastructure and Support. The occupation title and description, as well as reported job titles, are included in Exhibit 1.

Exhibit 1 - Occupation, description, and sample job titles

SOC Code	Title	Description	Sample of Reported Job Titles
15-1122	Information Security Analysts	Plan, implement, upgrade, or monitor security measures for the protection of computer networks and information. May ensure appropriate security controls are in place that will safeguard digital files and vital electronic infrastructure. May respond to computer security breaches and viruses.	Data Security Administrator, Information Security Officer, Information Security Specialist, Information Systems Security Analyst, Information Systems Security Officer, Information Technology Security Analyst (IT Security Analyst), Information Technology Specialist, Network Security Analyst, Security Analyst, Systems Analyst

Notes

Data included in this analysis represents the labor market demand for positions most closely related to Computer Infrastructure and Support. Standard occupational classification (SOC) codes were chosen based on the training goals of the proposed certificates. Traditional labor market information was used to show current and projected employment based on data trends, as well as annual average awards granted by regional community colleges.
