	Emerging	Occu	pation(s)				
Yes		•		No ☑			

The Los Angeles/Orange County Center of Excellence for Labor Market Research (COE) prepared this report to provide Los Angeles/Orange County regional labor market supply and demand data related to four middle-skill occupations:

- General and operations managers (11-1021);
- Administrative services and facilities managers (11-3011);
- Industrial production managers (11-3051); and
- First-line supervisors of office and administrative support workers (43-1011).

Middle-skill occupations typically require some postsecondary education, but less than a bachelor's degree.¹ Although the occupations in this report typically require a bachelor's degree, they are considered middle-skill because approximately one-third of workers in the field have completed some college or an associate degree. This report is intended to help determine whether there is demand in the local labor market that is not being met by the supply from community college programs that align with the relevant occupations.

Based on the available data, there does not appear to be a supply gap for these business management-related occupations in the region. However, the business programs summarized in this report are often general enough that they provide training for several occupations beyond those included in this report, so this basic supply/demand analysis should not be the only basis considered for program endorsement. Furthermore, 98% of awards conferred by non-community college institutions in related programs are Bachelor's degrees. While it is unlikely that community

<sup>&</sup>lt;sup>1</sup> The COE classifies middle-skill jobs as the following:

All occupations that require an educational requirement of some college, associate degree or apprenticeship;

All occupations that require a bachelor's degree, but also have more than one-third of their existing labor force with an educational attainment of some college or associate degree; or

All occupations that require a high school diploma or equivalent or no formal education, but also require short- to long-term on-the-job training where multiple community colleges have existing programs.

college students obtaining this certificate as their highest level of education completed will be qualified for many of these job openings, this program may provide an opportunity for students from related fields to upskill their existing business knowledge and skillset.

While all four occupations have entry-level wages that exceed the living wage in both Los Angeles and Orange counties, three of the four occupations typically require a bachelor's degree, and between 30% and 35% of incumbent workers have completed some college or an associate degree. Therefore, due to some of the criteria being met, the COE endorses this program. Detailed reasons include:

#### Demand:

- Supply Gap Criteria Over the next five years, there is projected to be 15,031 jobs available annually in the region due to retirements and workers leaving the field, which is less than the 21,487 awards (CC completions + awards less than a master's degree at non-community college institutions) conferred annually by educational institutions in the region.
- Living Wage Criteria All four occupations have entry-level hourly wages above the Los Angeles County living wage (\$15.04/hour).<sup>2</sup>
- Educational Criteria The Bureau of Labor Statistics (BLS) lists a high school diploma or
  equivalent as the typical entry-level education for first-line supervisors of office and
  administrative support workers (43-1011); and a bachelor's degree for general and
  operations managers (11-1021); administrative services and facilities managers (113011); and industrial production managers (11-3051).
  - National-level educational attainment data indicates between 30% and 41% of workers in the field have completed some college or an associate degree.

#### Supply:

- All 29 community colleges in the LA/OC region offer programs that have historically trained for the occupations of interest, conferring an average of 9,191 awards annually between 2017 and 2020.
- Between 2016 and 2019, there was an average of 12,296 awards conferred annually in related training programs by non-community college institutions.
  - Of these awards, 12,026 were Bachelor's degrees.

<sup>&</sup>lt;sup>2</sup> Living wage data was pulled from California Family Needs Calculator on 4/29/2021. For more information, visit the California Family Needs Calculator website: <a href="https://insightcced.org/2018-family-needs-calculator/">https://insightcced.org/2018-family-needs-calculator/</a>.

## **Occupational Demand**

Exhibit 1 shows the five-year occupational demand projections for the four occupations of interest. In Los Angeles/Orange County, the number of jobs related to these occupations is projected to decrease by 4% through 2024. However, there will be 15,031 job openings per year through 2024 due to retirements and workers leaving the field.

This report includes employment projection data by Emsi, which uses EDD information. Emsi's projections are modeled on recorded (historical) employment figures and incorporate several underlying assumptions, including the assumption that the economy, during the projection period, will be at approximately full employment. To the extent that a recession or labor shock, such as the economic effects of COVID-19, can cause long-term structural change, it may impact the projections. At this time, it is not possible to quantify the impact of COVID-19 on projections of industry and occupational employment. Therefore, the projections included in this report do not take the impacts of COVID-19 into account.

2019-2024 2019-2024 Annual 2019 Jobs 2024 Jobs Geography Change % Change **Openings** Los Angeles 137,216 131,129 (6,087)(4%)10,802 53,340 51,250 (2,090)4,229 Orange (4%)Total 190,556 182,379 (8,177)(4%) 15,031

Exhibit 1: Occupational demand in Los Angeles and Orange Counties<sup>3</sup>

### Wages

The labor market endorsement in this report considers the entry-level hourly wages for these business management occupations in Los Angeles County, as they relate to the county's living wage. Orange County wages are included below in order to provide a complete analysis of the LA/OC region. Detailed wage information, by county, is included in Appendix A.

**Los Angeles County:** All four occupations have entry-level wages above the living wage for one adult (\$15.04 in Los Angeles County). Typical entry-level hourly wages are in a range between \$22.99 and \$38.56. Experienced workers can expect to earn wages between \$37.19 and \$88.27, which are higher than the living wage estimate.

**Orange County:** All four occupations have entry-level wages above the living wage for one adult (\$17.36 in Orange County). Typical entry-level hourly wages are in a range between \$22.89 and \$40.33. Experienced workers can expect to earn wages between \$37.01 and \$97.82, which are higher than the living wage estimate.

<sup>&</sup>lt;sup>3</sup> Five-year change represents new job additions to the workforce. Annual openings include new jobs and replacement jobs that result from retirements and separations.

#### **Job Postings**

Over the past 12 months, there have been 22,618 online job postings for the four occupations studied in this report. The highest number of job postings were for operations manager, office manager, and general manager. The top skills were budgeting, scheduling, and customer service. The top employers, by number of job postings, in the region were Anthem Blue Cross, Dollar Tree, and CVS Health.

It is important to note that the job postings data included in this section reflects online job postings listed in the past 12 months and does not yet demonstrate the impact of COVID-19. While employers have generally posted fewer online job postings since the beginning of the pandemic, the long-term effects are currently unknown.

#### **Educational Attainment**

The Bureau of Labor Statistics (BLS) lists a high school diploma or equivalent as the typical entry-level education for first-line supervisors of office and administrative support workers (43-1011); and a bachelor's degree for general and operations managers (11-1021); administrative services and facilities managers (11-3011); and industrial production managers (11-3051). National-level educational attainment data indicates between 30% and 41% of workers in the field have completed some college or an associate degree. Of the 68% of job postings listing a minimum education requirement in Los Angeles/Orange County, 26% (4,009) requested a high school diploma, 5% (795) requested an associate degree, and 69% (10,485) requested a bachelor's degree.

## **Educational Supply**

Community College Supply — Exhibit 2 shows the annual and three-year average number of awards conferred by community colleges in the related TOP codes: Business and Commerce, General (0501.00); Business Administration (0505.00); Business Management (0506.00); Management Development and Supervision (0506.30); and Office Management (0514.40). The colleges with the most completions in the region are Coastline, Pasadena, and Cerritos. Over the past 12 months, there were 12 other related program recommendation requests from regional community colleges.

**Non-Community College Supply** — It is important to consider the supply from non-community college programs in the region that have historically trained for the occupations of interest. Exhibit 3 shows the annual and three-year average number of awards conferred by these institutions in the related Classification of Instructional Programs (CIP) Codes: Business / Commerce, General (52.0101); and Business Administration and Management, General (52.0201).

Due to different data collection periods, the most recent three-year period of available data is from 2016 to 2019. Between 2016 and 2019, non-community college institutions in the region conferred an average of 12,296 awards annually in related training programs. It is worth noting that 98% of these awards (12,026) are Bachelor's degrees.
