

Electro-Mechanical and Mechatronics Technologists and Technicians

Labor Market Analysis: San Diego County

October 2022

Summary

The San Diego-Imperial Center of Excellence for Labor Market Research (COE) developed this brief to assist the region's community colleges with strategic planning and program development. According to available labor market information, *Electro-Mechanical and Mechatronics Technologists and Technicians* in San Diego County have a labor market demand of 14 annual job openings (while average demand for a single occupation in San Diego County is 242 annual job openings), and no educational institutions in San Diego County supply awards for this occupation, suggesting that there is a supply gap in the labor market. Entry-level wages are above the living wage for this occupation. This brief recommends to proceed with developing a new program and supports a program modification because 1) there is a supply gap in the region; 2) entry-level earnings for this occupation are above the living wage; and 3) no educational institutions currently train for this occupation.

Introduction

This report provides labor market information in San Diego County for the following occupational code in the Standard Occupational Classification (SOC)¹ system:

Electro-Mechanical and Mechatronics Technologists and Technicians (SOC 17-3024): Operate, test, maintain, or adjust unmanned, automated, servomechanical, or electromechanical equipment. May operate unmanned submarines, aircraft, or other equipment to observe or record visual information at sites such as oil rigs, crop fields, buildings, or for similar infrastructure, deep ocean exploration, or hazardous waste removal. May assist engineers in testing and designing robotics equipment. Sample reported job titles include:

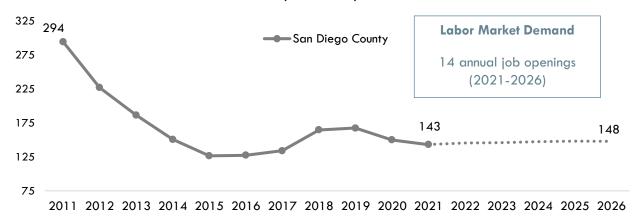

- Product Test Specialist
- Process Control Tech
- Mechanical Technician
- Maintenance Technician
- Instrumentation and Process Controls Technician

- Automation Technician
- Programmable Logic Controllers Technician
- Process Control Technician
- Instrumentation and Controls Technician
- Engineering Technician

Projected Occupational Demand

Between 2021 and 2026, *Electro-Mechanical and Mechatronics Technologists and Technicians* are projected to increase by five net jobs or three percent (Exhibit 1). Employers in San Diego County will need to hire 14 workers annually to fill new jobs and backfill jobs due to attrition caused by turnover and retirement, for example.

Exhibit 1: Number of Jobs for Electro-Mechanical and Mechatronics Technologists and Technicians (2011-2026)²

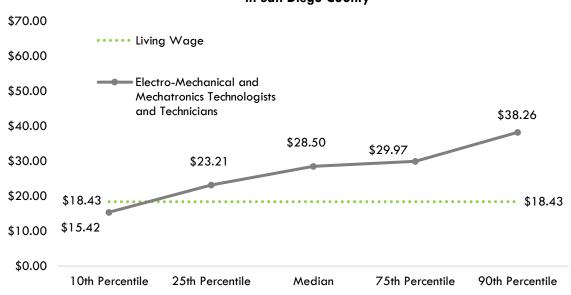

¹ The Standard Occupational Classification (SOC) system is used by federal statistical agencies to classify workers into occupational categories for the purpose of collecting, calculating or disseminating data. bls.gov/soc.

² EMSI 2022.03; QCEW, Non-QCEW, Self-Employed.

Earnings

Electro-Mechanical and Mechatronics Technologists and Technicians receive entry-level hourly earnings of \$23.21; this is more than the living wage for a single adult in San Diego County, which is \$18.43 per hour (Exhibit 2).3

Exhibit 2: Hourly Earnings⁴ for Electro-Mechanical and Mechatronics Technologists and Technicians in San Diego County⁵

³ "Family Needs Calculator (formerly the California Family Needs Calculator)," Insight: Center for Community Economic Development, last updated 2021. insightcced.org/family-needs-calculator.

⁴ 10th and 25th percentiles could be considered entry-level wages, and 75th and 90th percentiles could be considered experienced wages for individuals who may have been in the occupation longer, received more training than others, etc.

⁵ EMSI 2022.03; QCEW, Non-QCEW, Self-Employed.

Educational Supply

Educational supply for an occupation can be estimated by analyzing the number of awards in related Taxonomy of Programs (TOP) or Classification of Instructional Programs (CIP) codes.⁶ There are three TOP codes and three CIP codes related to *Electro-Mechanical and Mechatronics Technologists and Technicians* (Exhibit 3).

Exhibit 3: Related TOP and CIP Codes for Electro-Mechanical and Mechatronics Technologists and Technicians

TOP or CIP Code	TOP or CIP Program Title	
TOP 0935.00	Electro-Mechanical Technology	
TOP 0943.00	Instrumentation Technology	
TOP 0948.40	Alternative Fuels and Advanced Transportation Technology	
CIP 15.0403	5.0403 Electromechanical Technology/Electromechanical Engineering Technology	
CIP 15.0404	Instrumentation Technology/Technician	
CIP 47.0614	Alternative Fuel Vehicle Technology/Technician	

⁶ TOP data comes from the California Community Colleges Chancellor's Office MIS Data Mart (datamart.cccco.edu) and CIP data comes from the Integrated Postsecondary Education Data System (nces.ed.gov/ipeds/use-the-data).

According to TOP and CIP data, no community college or other educational institution supplies the region with awards for this occupation (Exhibit 4).

Exhibit 4: Number of Awards (Certificates and Degrees) Conferred by Postsecondary Institutions

(Program Year 2017-18 through Program Year 2020-21 Average)

TOP6 or CIP	TOP6 or CIP Title	3-Yr Annual Average CC Awards (PY18-19 to PY20-21)	Other Educational Institutions 3-Yr Annual Average Awards (PY17-18 to PY19-20)	3-Yr Total Average Supply (PY17-18 to PY20-21)
0935.00	Electro-Mechanical Technology	0	0	0
0943.00	Instrumentation Technology	0	0	0
0948.40	Alternative Fuels and Advanced Transportation Technology	0	0	0
15.0403	Electromechanical Technology/Electromechanical Engineering Technology	0	0	0
15.0404	Instrumentation Technology/Technician	0	0	0
47.0614	Alternative Fuel Vehicle Technology/Technician	0	0	0
			Total	0

Demand vs. Supply

Comparing labor demand (annual openings) with labor supply⁷ suggests that there is a supply gap for this occupation in San Diego County, with 14 annual openings and zero awards. Comparatively, there are 143 annual openings in California and 129 awards, suggesting that there is also a supply gap across the state⁸ (Exhibit 5).

Exhibit 5: Labor Demand (Annual Openings) Compared with Labor Supply (Average Annual Awards)

	Demand (Annual Openings)	Supply (Total Annual Average Supply)	Supply Gap or Oversupply
San Diego	14	0	14
California	143	129	14

Please note: This is a basic analysis of supply and demand of labor. The data does not include workers currently in the labor force who could fill these positions or workers who are not captured by publicly available data. This data should be used to discuss the potential gaps or oversupply of workers; however, it should not be the only basis for determining whether or not a program should be developed.

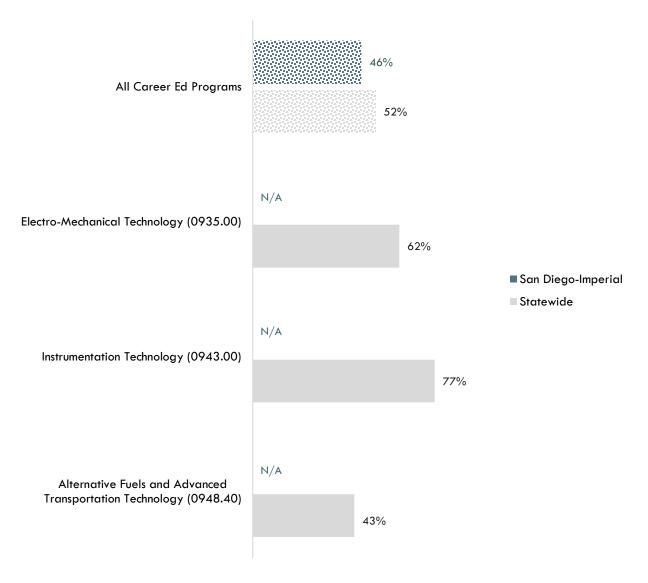

⁷ Labor supply can be found from two different sources: EMSI or the California Community Colleges Chancellor's Office MIS Data Mart. EMSI uses CIP codes while MIS uses TOP codes. Different coding systems result in differences in the supply numbers.

¹² Most recent year with available data is Program Year 2018-19. Percentage of Students in a Job Closely Related to Field of Study: Among students who responded to the CTEOS, the percentage reporting employment in the same or similar field as their program of study.

Online Job Postings

This report analyzes not only historical and projected (traditional LMI) data, but also recent data from online job postings (real-time LMI). Online job postings may provide additional insight about recent changes in the labor market that are not captured by historical data. Between 2011 and 2021, there was an average of 318 online job postings per year for *Electro-Mechanical and Mechatronics Technologists and Technicians* in San Diego County (Exhibit 7). Please note that online job postings do **not** equal labor market demand; demand is represented by annual job openings (see Exhibit 1). While this brief includes online jobs postings data to help with curriculum development, the community colleges should note that this type of data is impacted by several variables: employers may post a position multiple times to increase the pool of applicants; a job posting can remain posted after a business decides not to fill a position; or an employer may use one posting to fill multiple positions, for example.
