	Emerging Occupation(s)										
Yes		No 🗹									

The Orange County Center of Excellence for Labor Market Research (COE) prepared this report to provide Los Angeles/Orange County regional labor market supply and demand data related to two middle-skill occupations: photographers (27-4021), and camera operators, television, video and motion picture (27-4031). Middle-skill occupations typically require some postsecondary education, but less than a bachelor's degree.¹ This report is intended to help determine whether there is demand in the local labor market that is not being met by the supply from community college programs that align with the relevant occupations.

Based on the available data, there does not appear to be a supply gap for these middle-skill cinematography occupations in the region. However, the supply data in this report includes completers who have been trained for various television and film occupations, and not solely photography and/or cinematography occupations. Additionally, the demand data in this report includes annual openings for all photography and camera operation occupations, not solely those that are related to drone cinematography. For those reasons, the COE is unable to determine the gap between supply and demand. While more than one-third of current workers in this field have completed some college or an associate degree, entry-level wages are lower than the living wage in Orange County. Therefore, due to some of the criteria being met, the COE endorses this proposed program. Detailed reasons include:

Demand:

• Supply Gap Criteria – Over the next five years, there is projected to be 1,555 jobs available annually in the region due to new job growth and replacements, which is less than the 2,869 awards conferred annually by educational institutions in the region.

¹ The COE classifies middle-skill jobs as the following:

[•] All occupations that require an educational requirement of some college, associate degree or apprenticeship;

[•] All occupations that require a bachelor's degree, but also have more than one-third of their existing labor force with an educational attainment of some college or associate degree; or

[•] All occupations that require a high school diploma or equivalent or no formal education, but also require short- to long-term on-the-job training where multiple community colleges have existing programs.

- However, both SOC codes in this report include all photography and camera operation occupations, and not solely drone-related cinematography occupations. Since the SOC code does not solely represent drone cinematography, the number of annual job openings is overstated.
- Over the past 12 months, there were 103 online job postings related to drone photography and/or camera operation. The highest number of job postings were for photographers, real estate drone photographers, videographer/editors, architectural photographers, and associate architectural photographers
- Living Wage Criteria Within Orange County, all of the annual job openings for these middle-skill occupations related to cinematography have entry-level wages below the county's living wage (\$17.36/hour).²
- Educational Criteria Within the LA/OC region, 66% of the annual job openings for middle-skill occupations related to cinematography typically require a high school diploma.
 - While the national-level educational attainment data indicates between 24.2% and 33.7% of workers in the field have completed some college or an associate degree, the occupation with the majority of the annual openings for these middle-skill cinematography occupations (photographers) has 33.7% of workers in in the field who have completed some college or an associate degree.

Supply:

- There are **24 community colleges** in the LA/OC region that issue awards related to cinematography, conferring an average of **721 awards annually** between 2017 and 2020.
 - However, the TOP codes included in this report train for 10 other occupations in addition to middle-skill cinematography occupations, such as audio and video equipment technicians (27-4011), broadcast technicians (27-4012), and sound engineering technicians (27-4014). Since these programs train for a variety of occupations with different skill-sets than what is necessary for cinematography, the COE is unable to determine the supply data solely for photographers and camera operators.
- Between 2016 and 2019, there was an average of **2,148** awards conferred annually in related training programs by non-community college institutions throughout the region.
 - Just as with the TOP Codes, these CIP codes also train for a variety of occupations, and not solely cinematography-related occupations. Therefore, the COE is unable to determine the 4-year supply solely for photographers and camera operators.

² Living wage data was pulled from California Family Needs Calculator on 6/2/2021. For more information, visit the California Family Needs Calculator website: <u>https://insightcced.org/2018-family-needs-calculator/</u>.

Occupational Demand

Exhibit 1 shows the five-year occupational demand projections for these middle-skill occupations related to cinematography. In Los Angeles/Orange County, the number of jobs related to these occupations is projected to increase by 2% through 2024. There will be more than 1,500 job openings per year through 2024 due to job growth and replacements. It is important to note that both SOC codes in this report include all photography occupations and not solely drone-related photography and/or cinematography. Therefore, the data in Exhibit 1 is likely overstated for drone cinematography.

This report includes employment projection data by Emsi which uses EDD information. Emsi's projections are modeled on recorded (historical) employment figures and incorporate several underlying assumptions, including the assumption that the economy, during the projection period, will be at approximately full employment. To the extent that a recession or labor shock, such as the economic effects of COVID-19, can cause long-term structural change, it may impact the projections. At this time, it is not possible to quantify the impact of COVID-19 on projections of industry and occupational employment. Therefore, the projections included in this report do not take the impacts of COVID-19 into account.

Geography	2019 Jobs	2024 Jobs	2019-2024 Change	2019-2024 % Change	Annual Openings
Los Angeles	13,599	13,832	233	2%	1,309
Orange	2,551	2,577	26	1%	247
Total	16,150	16,409	259	2%	1,555

Exhibit 1: Occupational demand in Los Angeles and Orange Counties³

Wages

The labor market endorsement in this report considers the entry-level hourly wages for these middle-skill occupations related to cinematography in Orange County as they relate to the county's living wage. Los Angeles County wages are included below in order to provide a complete analysis of the LA/OC region. Detailed wage information, by county, is included in Appendix A.

Orange County— All of the annual openings for these middle-skill occupations related to cinematography have entry-level wages below the living wage for one adult (\$17.36 in Orange County). Typical entry-level hourly wages are in a range between \$12.73 and \$14.84. Experienced workers can expect to earn wages between \$42.42 and \$43.75, which are higher than the living wage estimate. Orange County's average wages are above the average statewide wage of \$36.89 for these occupations.

Los Angeles County— The majority (62%) of annual openings for these middle-skill occupations related to cinematography have entry-level wages below the living wage for one adult (\$15.04 in Los Angeles County).⁴ Typical entry-level hourly wages are in a range between \$13.38 and

³ Five-year change represents new job additions to the workforce. Annual openings include new jobs and replacement jobs that result from retirements and separations.

⁴ Living wage data was pulled from California Family Needs Calculator on 6/2/2021. For more information, visit the California Family Needs Calculator website: <u>https://insightcced.org/2018-family-needs-calculator/</u>.

\$17.48. Experienced workers can expect to earn wages between \$43.43 and \$48.37, which are higher than the living wage estimate. Los Angeles County's average wages are above the average statewide wage of \$36.89 for these occupations.

Job Postings

There were 103 online job postings related to drone photography and/or camera operation listed in the past 12 months. The highest number of job postings were for photographers, real estate drone photographers, videographer/editors, architectural photographers, and associate architectural photographers. The top skills were: photography, videography, Adobe Photoshop, Adobe InDesign, and scheduling. The top three employers, by number of job postings, in the region were: Costar Realty Group, Fox Corporation, and The Luxury Level.

It is important to note that the job postings data included in this section reflects online job postings listed in the past 12 months and does not yet demonstrate the impact of COVID-19. While employers have generally posted fewer online job postings since the beginning of the pandemic, the long-term effects are currently unknown.

Educational Attainment

The Bureau of Labor Statistics (BLS) lists a high school diploma as the typical entry-level education for photographers, and a bachelor's degree for camera operators, television, video, and film. In the LA/OC region, the majority of annual job openings (66%) typically require a high school diploma. While the national-level educational attainment data indicates between 24.2% and 33.7% of workers in the field have completed some college or an associate degree, the occupation with the majority of the annual openings for these middle-skill cinematography occupations (photographers) has 33.7% of workers in the field who have completed some college or an associate degree as their highest level of education. Of the 39% of drone photography and/or camera operation job postings listing a minimum education requirement in Los Angeles/Orange County, 90% (36) requested a high school diploma, 5% (2) requested an associate degree and 5% (2) requested a bachelor's degree.

Educational Supply

Community College Supply—Exhibit 2 shows the three-year average number of awards conferred by community colleges in the related TOP codes: Television (including combined TV/Film/Video (0604.20), Film Production (0612.20), Digital Media (0614.00), and Applied Photography (1012.00). The colleges with the most completions in the region are: LA City, Orange Coast, and Santa Monica. Over the past 12 months, there were 14 other related program recommendation requests from regional community colleges.

The TOP Codes in this report train for 10 television and film-related occupations in addition to the middle-skill cinematography occupations in this report. Therefore, COE is unable to determine the supply data when solely considering cinematography-related occupations.

Non-Community College Supply—For a comprehensive regional supply analysis, it is also important to consider the supply from other institutions in the region that provide training programs for cinematography-related occupations. Exhibit 3 shows the annual and three-year average number of awards conferred by these institutions in the related Classification of Instructional Programs (CIP) Codes: Radio and Television (09.0701), Digital Communication and Media/Multimedia (09.0702), Radio and Television Broadcasting Technology/Technician (10.0202), Digital Arts (50.0102), Design and Visual Communications, General (50.0401), Cinematography and Film/Video Production (50.0602) and Film/Video and Photographic Arts, Other (50.0699). Due to different data collection periods, the most recent three-year period of available data is from 2016 to 2019. Between 2016 and 2019, four-year colleges in the region conferred an average of 2,148 awards annually in related training programs.

As with the TOP Codes, the CIP codes in this report train for various television and film occupations, and not solely cinematography-related occupations. Therefore, the COE cannot determine the supply data solely for cinematography-related occupations.

CIP			2016-	2017-	2018-	3-Year
