Economic & Workforce Development Division
Imperial Valley College
380 E. Aten Rd.
Imperial, CA 92251

To Whom It May Concern:

As a representative of Andrade Acquisitions and Building, I, Luis Andrade, endorse the development of a new program at Imperial Valley College in building construction drafting technology. There is a growing need for individuals that have construction and drafting experience and is expected to create many new job opportunities in the next few years in the construction industry. I confirm that there will be an unmet labor market demand in Imperial County for the occupations related to this program training. The occupations for which these programs need to provide training include:

- AutoCad Drafting Technicians
- Building Construction Technicians

Entry-level salaries for these occupations range between \$16.50 and \$22.50. We anticipate hiring 2 Construction drafting technicians during this year and the next year. This employment growth is projected by 2023, and a recurring yearly need of 1 Drafting technicians, and 3 Construction technicians as our population increases.

This affirms that there will be jobs available for program completers within the local service area of Imperial Valley College after taking into account the number of completers of similar programs at other institutions.

If you have any questions, feel free to contact me at 510-504-6641 or luis.andrade@gmail.com.

Sincerely,

Luis Andrade

RE: AutoCad -Building Construction Program Endorsement

To Whom It May Concern:

As a representative of A.C.E, I, Annet Mercado, support the Development of a new program at Imperial Valley College in building construction drafting technology. There is a growing and continuous need for individuals that have construction and drafting experience, which are currently in high demand. There will be many job opportunities in the next few years in the construction industry and in our entity. I confirm that there will be an unmet labor market demand in Imperial County for the occupations related to this program training. The occupations for which these programs need to provide training include:

- AutoCAD Drafting Technicians
- Building Construction Technicians

Entry-level salaries for these occupations range between \$18 and \$ 25. We project hiring 1 Construction drafting technician during 2022. This employment growth is projected through 2024, and we will have a continuous yearly need of 2 Drafting technicians. In addition, we anticipate hiring 4 Drafting technicians per year as the construction industry grows.

Our Company affirms that there will be jobs available for program completers within the area of Imperial Valley, which can be filled with the graduates of Imperial Valley College once this program is started.

If you have any questions, feel free to contact me at (760) 487-1486 or
